ABSTRACTED-PUB-NO: JP 02200828A

BASIC-ABSTRACT:

Yarn comprises cutting a thin sheet of metal or alloy in a fine width, e.g. noble metal base, making thin plate by providing about 100% noble metal at one side of the plate. The noble metal includes gold, silver and platinum.

USE/ADVANTAGE - Yarn has good tensile strength. When the yarn is employed by warp and weft, woven fabrics have good quality without change of tensile strength.

ABSTRACTED-PUB-NO: JP 03014651A

BASIC-ABSTRACT:

Foil warp forming embroidered pattern, foil warp for forming base pattern together with gold and/or silver warp and base warp are hung by a pattern needle. Foil yarn, gold and/or silver yarn and base yarn are used as weft. Formation is woven by the warp for forming base pattern and the base weft, and by weaving them and gold and/or silver weft an embroidered pattern is formed in the formation.

ADVANTAGE: Woven fabric having figures pattern can be formed by jacquard weaving machine.
